### Background

In 2017 the United Nations adopted a **Treaty on the Prohibition of Nuclear Weapons (TPNW)**. Despite this, the nuclear armed states continue to modernize their nuclear forces and maintain the threat of nuclear war as a core security doctrine. The corporations manufacturing nuclear weapons and their delivery systems are strong supporters and drivers of the nuclear arms race, as they personally benefit from the \$100 billion spent annually on nuclear weapons.

This roundtable will discuss initiatives in Austria, Europe and globally to cut nuclear weapons budgets, divest from nuclear weapons corporations and reallocate these budgets and investments to climate protection, poverty alleviation and sustainable development.
